Dear Sir:

Regarding subject project referenced,

The client devices while installed in the receiver, wireless charging battery cover/sleeve, will be reviewed for EMC, SAR and HAC requirements. For purposes of equipment authorization, the wireless charging cover will be tested separately as an integral part of the handset for EMC, SAR and HAC requirements to ensure the handset is compliant according to KDB 648474 D03 Handset Wireless Battery Chargers v01.

We attest that marketing of the LSWC-TBW22-M and printing of the user manual will be on hold until the client devices (cell phones) with the receiver incorporating the wireless charging hardware has been reviewed with respect to compliance with EMC, SAR and HAC requirements.

Sincerely,

Danny Seo

Section Chief / LS Cable & System Ltd.
